

## Description

Learning.com provides solutions to help K-8 students, teachers, and schools excel in a digital world. Their digital literacy solutions help ensure that students are prepared for success in school, college, and the workplace. Learning.com supports Broward's move to digital content with tools to build and share district-created digital curriculum.

## Rationale

Learning.com is currently in use here in the district by the Sprouting STEM schools: Atlantic West ES, Broward Estates ES, Colbert ES, Plantation ES, Liberty ES, and Royal Palm ES. This purchase will expand its use to Digital 3-6 classrooms, Global Scholars Schools (19 MS), and 2nd grade students in Digital 3-5 schools (digital in all three grade levels).

Students will develop critical digital literacy skills including hardware/software fundamentals, keyboarding, word processing, media and information literacy. These aspects are reported to the State (Digital Classroom Plan). Students will participate in project-based approach to integrating digital literacy into core subject instruction with ready to go projects per grade level. Projects help students learn about productivity tools, internet research, multimedia presentations, online communication and other digital literacy skills. This will help the district promote the use of the technology that is being delivered to schools through the IT Bond, as well as give our new Learning Management System content to disburse to schools.
